

JazzHR: Hiring and Recruiting

Integrate with JazzHR to bring powerful recruiting, onboarding, and payroll management all in one affordable, easy-to-use package that helps small businesses grow.

Automate Recruiting

Save time spent on painfully tedious tasks like re-writing emails and start automating the recruiting process.

Built for Small Businesses

Simple, affordable and customizable, JazzHR has all the features that you need and none of what you don't.

Powerful Integrations

A full catalogue of [integrations](#) to complement any HR tech stack, including SparkHire, HackerRank, background check tools, and LinkedIn.

Who should work with JazzHR?

HR and recruiting teams who need to speed up their time to hire, increase recruiting efficiency, and get more candidates.

What does JazzHR do?

JazzHR is a powerful applicant tracking system that helps HR teams better collaborate and automate to improve hiring efficiency and create the perfect candidate experience.

What does it cost?

JazzHR is affordable yet robust with a variety of pricing options. We never penalize you for growth, so pricing is based on what features you need--not employee size. You can start out at \$39/mo with a few open jobs, or grow into JazzHR Pro at \$309/mo with all features, functionality, and all-access support.

But I have an ATS already?

All-in-ones that offer an ATS as a part of their solution are only focused on recruiting as a small part of their solution. JazzHR lives and breathes recruiting and has best in class features for every step of the candidate lifecycle.

Other competitors offer the same functionality as JazzHR but at up to 10x the cost. Why spend more for the same thing? We're focused on providing small businesses with what they need at a price they can afford.

About JazzHR

A pioneer in the HCM space, JazzHR has been providing recruiting solutions to small and medium sized businesses since 2009. JazzHR has helped over 2,500 companies hire over 200,000 candidates in over 40 different industries.
